Advancing your nonprofit’s mission requires determination, focus and wherewithal on the part of your staff, volunteers and donors, but it also requires an operational and financial strategy that builds on the organization’s present energy and facilitates future success.

Whether it’s the preparation of federal, state or local filings, reinstatement as a tax-exempt entity, a plan for the prevention of fraud or an audit of your financial statements or employee benefit plan, The MFA Companies® Nonprofit Practice can assist organizations in meeting their compliance obligations while also providing strategic consulting that helps identify opportunities for growth and ways in which to advance the mission.
